EXPERIENCE

Amotions Inc | *Software Engineer* Jan 2023 – Mar 2025

- Architected and enforced role-based access control (RBAC) and fine-grained authorization logic across secure, production-grade backend APIs, hardening platform security at scale.
- Engineered end-to-end data pipelines and applied statistical analysis on real-time user behavioral data, directly driving a 30–40% improvement in session duration through predictive insights.
- Designed and delivered high-throughput backend services and REST APIs powering media-sharing features across a platform serving thousands of active users.
- Built real-time data synchronization services on Firebase (NoSQL), achieving low-latency updates and horizontal scalability to support rapid user growth.
- **Technologies:** JavaScript, TypeScript, React, Node.js, REST APIs, Firebase (NoSQL), Distributed Systems

Amotions Inc | *Software Engineer Intern* Nov 2022 – Jan 2023

- Onboarded into a fast-paced engineering environment, rapidly contributing to backend feature development and gaining hands-on exposure to production systems, distributed architectures, and team-based agile workflows.

College of San Mateo | *Data Structures & Algorithms Tutor* Aug 2018 – May 2020

- Delivered instruction on core CS fundamentals, including time/space complexity, recursion, and algorithm optimization, to undergraduate students, measurably strengthening problem-solving performance.
- Diagnosed and resolved bugs in Java and C++ implementations, improving code correctness and runtime efficiency across student projects.
- Designed supplemental exercises and problem sets that reinforced computational thinking and deepened students' mastery of algorithm design principles.
- Partnered directly with faculty to align tutoring content with curriculum objectives and identify recurring student misconceptions, driving continuous instructional improvement.

EDUCATION

San José State University — San José, CA | *M.S. in Computer Science* Aug 2025 – May 2027

University of California, Santa Cruz — Santa Cruz, CA | *B.S. in Computer Science* Oct 2020 – May 2022

- Dean's List

College of San Mateo — San Mateo, CA | *A.S. in Computer Science, Engineering, Math & Physics* Aug 2017 – May 2020

- Dean's List

PROJECTS

Expenses Management System — *Backend Focused* Mar 2025 – Present

- Designed and implemented a suite of RESTful APIs powering a full-featured expense tracking system with rich reporting, analytics, and comparative cost-trend analysis.
- Architected a high-volume, scalable NoSQL data model using MongoDB and Mongoose, optimized to handle large transaction loads with minimal latency.
- Engineered local storage persistence as a resilient offline fail-safe, strengthening data reliability and security under adverse connectivity conditions.
- Applied rigorous backend design patterns and separation-of-concerns principles, yielding a maintainable, extensible codebase ready for production scaling.
- **Stack:** Node.js, Express, MongoDB, Mongoose, JavaScript, HTML, CSS, Bootstrap
- **GitHub:** https://github.com/aboodnjtv/ems

Island-Reservation — *Team Lead & Product Owner*

- Spearheaded a 7-member cross-functional team to design and ship a scalable reservation platform, owning end-to-end backend architecture and delivery.
- Implemented authentication, authorization, and production-grade REST APIs backed by MongoDB, adhering to industry-standard security and scalability best practices.
- Drove product roadmap definition, sprint planning, and cross-team coordination, consistently delivering milestones on schedule.
- **Stack:** JavaScript, Node.js, Express, MongoDB, React
- **GitHub:** https://github.com/aboodnjtv/Island-Reservation

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python
Cloud Platforms: AWS (EC2, ECS, Fargate, ECR)
Containerization: Docker
Backend Frameworks: Node.js, Express.js, Next.js
Frontend: React
Databases: MongoDB, Firebase (NoSQL), SQL / MySQL
Tools & Practices: Git, GitHub, REST API Design, Distributed Systems, Agile / Scrum
Operating Systems: macOS, Linux, Windows
